

## Expert opinion on Simtomax®

---

### Study Characteristics

---

|                          |   |
|--------------------------|---|
| Study Site Location:     | University of Sheffield, Royal Hallamshire Hospital, Gastroenterology & Liver Unit, Sheffield, United Kingdom                                       |
| Principal Investigators: | Professor David S Sanders   |
| Dates:                   | 2013  |
| Type of Study:           | Review of the literature related to clinical studies evaluating the accuracy of the point of care tests for coeliac disease available on the market |

---

### Results

---

There are currently four available point of care tests available for use by health professionals. Evidence for the use of Simtomax is currently fairly limited. However, the results to date are encouraging and further research into this area is required.
